The Meta-Theory of the Riemann Hypothesis

By Parker Emmerson and Ryan J. Buchanan

TABLE OF CONTENTS

	Page(s)
i. Introduction	**2–3**
ii. The Resulting Meta-Theory of the Riemann Hypothesis	**4**
a) Riemann-Hypothesis Witness Fibres, Quantitative Θ-Atlas, Ξ-Certificates, Criterion Absorption, Nullity Matching, and Universal Selected-Logical Nullity	5–146
b) Selected Riemann-Hypothesis Witness Fibres, Validated Ξ-Certificates, Selection Jump, No-Transfer Barriers, and Maximal A-Priori Uniform Logical Nullity	147–217
c) Bridge Necessity, Nonterminality, Selection Jump, and Bridge Trichotomy: Toward a Barrier Hierarchy for Selected Closure	218
d) Exact Witness Architectures: Selection Jump and Limits of Exact Certification	264
e) A Full, Logical Stratification of RH-Type Propositions and Exact-Count Witness Calculi for the Riemann Ξ-Function	290
f) Terminal-Fiber Geometry of Exact Witness Architectures: Flat Null Models, Barrier Laws, and a Curved Axiomatic Extension	382
iii. Meta-Theoretic Papers Preliminary Research to the Main Discovery	**401**
a) The Architecture of the Imaginary	402
b) Completion Sensitivity and a Π^0_2-Complete RH Problem	452
c) Deprogramming Zero in Ramanujan's Heuristic Calculus	460
d) Cohomological Obstructions, Completion Sensitivity, and No Uniform Horizon Theorems for Proof-Carrying Software Supply Chains	501
e) RH Is Π^0_2 via Stagewise Certificates: A Certificate Calculus for the Riemann Ξ-Function	515
f) Completion Sensitivity of the Riemann Hypothesis under the Dirichlet Clause Package	551
g) From RH as Π^0_2 to Two Π^0_2-Complete Companion Problems: Generic Stagewise Sweeps and Completion-Sensitive RH Truth	569
h) A Master Theorem for the Riemann Hypothesis across Three Logical Levels	581
iv. Riemann Hypothesis Papers Preliminary to the Meta-Theoretic Framing	**595**
a) Short-Band Toeplitz	596
b) A Theta-Regularized Identity for SL2 and a Fejér-Windowed Strip Bridge for Log ξ	605
c) Rigorous Power Saving	621
d) Gödelian Aspects of a Fejér/CCI Approach to the Riemann Hypothesis	638

e) A Flow-Form Equivalence Framework for the Riemann Hypothesis: RJ Version 651
f) Dedicated Appendix Paper 737
g) A Flow-Form Equivalence Framework for the Riemann Hypothesis 783
h) A Canonical Ray Net for the Riemann ξ-Function and a Local Quasiconformal Rigidity Lemma 817
i) A Truncated Quasiconformal Energy for the Riemann ξ-Function 832
j) Analytic Incompleteness and Ordinal Closure Depth for the Riemann Hypothesis 888
k) Analytic Incompleteness and Ordinal Closure Depth for the Riemann Hypothesis: Resolution Ladders, Teichmüller Pinching, and Pointwise Upgrade Mechanisms 906
l) Theta-Flow Kernel, Fourfold Height Derivative, and Off-Critical Scaling 946
m) Width-Depth Energy for Corridor Ladders, Cardinality of Realizer Fibers, and Holomorphic Packaging 965
n) Analytic Incompleteness and Ordinal Closure Depth for the Riemann Hypothesis 1163
o) Stagewise Certificates for the Riemann Ξ-Function via Winding Number Proofs and Log-Derivative Slip Audits 1244
